

October 2022

We are keen to hear from YOU !

If you are excited by Computational Geometry, Mesh Generation, CFD or FEA and Application to Real World problems as well as enjoy the challenges of writing software, supporting clients use of our software or indeed wish to transfer skills to a business management position, then please get in touch with us, BoXeR Solutions kk (BSkk).

BSkk has an office in International House, Kobe and is a 100% owned subsidiary of Cambridge Flow Solutions Ltd (www.cambridgeflowsolutions.com) a UK registered company with offices on the Cambridge Science Park, UK.

Generate designs and mesh complex geometries with BOXER software

Providing easy, fast access to complex simulation.

BOXER software is built from the ground up to be parallel and scalable for fast mesh generation and can resolve 'dirty' imported CAD from a range of sources. Seamlessly integrate BOXER into your workflow and save time by eliminating cumbersome CAD fixing and de-featuring steps for your engineers.

Our newest product- BOXERgeom offers a simple but powerful tool to morph geometry for use in a wide range of applications including part degradation and particulate build up.

Please get in touch with us to find out whether BOXER software can be useful for you.

For further information on our software, BOXER, please visit BOXERsolutons Ltd, <https://boxersolutions.com/>.

To express an interest, please email careers@cambridgeflowsolutions.com.
